Papier-mâché group focuses on basic shapes and mould that gives multi-purpose and attractive products. It is the most eco-friendly group of Jeeva. It is all about recyclability along with functionality. From clocks, calendars, utility containers. Dotted with cone craft, these products can add subtle charm to any decor with their earthen and traditional look.

Papier-mâché group focuses on basic shapes and mould that gives multi-purpose and attractive products. It is the most ecofriendly group of Beeja. It is all about recyclability along with functionality. Well clocks, pictures, utility containers. Donned with cone craft, these products can add subtle charm to any décor with their earthen and traditional look.

Block-carving as an art has been innate to the Pithavua region. Under the guidance of Sander Hussain and Shrip guru for block-carving, the group works diligently to bring out the most intricately done hand-carved wood adorning the steen of brass inlay. The products in this range include furniture, utility items, office products and home décor, mirrors, tray, photo frames, lamps.

Bamboo is the fastest growing woody plant and most viable alternative to wood. It provides most sustainable and environmental, yet stylish, lifestyle options. The Bamboo group at Beejo uses this enchanting grass entwined with the charm of handmade paper, Phambane fibre and paper-mâché to make a wide range of products including furniture, home décor and kitchenware.
